

LT-20U1-06AHBCMB

6 way PDU - Universal Sockets

The LT-20U1-06AHBCMB is a 6-way Power Distribution Unit (PDU) equipped with universal sockets, designed to efficiently manage and distribute electrical power in network racks, data centers, offices, and industrial setups. Engineered for versatility and reliability, this PDU accommodates multiple plug types, making it ideal for environments with varied power requirements. With a compact and robust design, it provides organized power access while maintaining safety and efficiency for mission-critical equipment and daily operations.

Key Features :

- Power Output: Provides a 6-way power output.
- Sockets: Equipped with universal sockets to accommodate multiple plug types.
- Central Control: An integrated power switch allows for centralized control of all connected devices.
- Status Indicator: Includes an LED indicator for visual confirmation of power status.
- Housing: Features a fire-resistant housing for enhanced safety.
- Mounting: Offers flexible wall and rack mountable options.
- Design: Features a high-durability, compact design.

Applications :

- Data Centers and Server Rooms
- IT and Telecom Racks
- Offices and Workstations
- Industrial Control Panels

Specification :

Parameter	Value / Description
Rating Voltage	240VAC 50/60Hz
Rating Current	13A
Max. Power	3120W
Socket Type	GB2099.3
Socket Quantity	6 way
Socket Design	6 x universal input plugs
Power Input	Left end single input
Cable with Plug	BS1363 13A plug
Cable Specification	3x1.5 mm x 1.8 mm
Control Function	16A lighted master switch
Protection Function	No protection function
Case Material / Color	Black
Product Size (L x W x H)	48.83 mm x 44.4 mm x 6.2 mm
Mounting Length	455.8 mm
Case Length	427.8 mm
Bracket Install	Inverse installation
Safety Authentication	CE
ROHS Compliance	Yes
