## 4U Indoor Cabinet with 2 Fans and 1 Rack Shelf

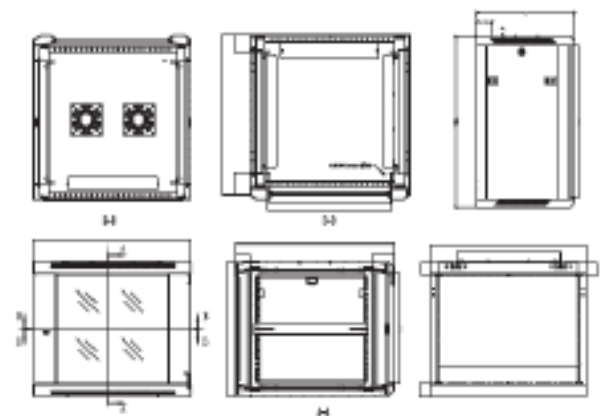

The Lamatel LT-CAB4U2F1R is a robust 4U indoor cabinet designed to house and organize network and IT equipment in a secure and efficient manner. Ideal for office environments, data centers, or control rooms, this unit offers a compact solution for managing critical electronics. It features two pre-installed fans for enhanced airflow and thermal regulation, helping prevent overheating of sensitive components. The cabinet also includes one rack shelf, providing added flexibility for mounting non-rackable devices or accessories. With its solid construction and space-efficient design, the LT-CAB4U2F1R ensures optimal performance and equipment protection in a variety of professional settings.

### Key Features

- Compact 4U design ideal for small to mid-sized setups
- Built-in dual fans for effective cooling
- Includes one rack shelf for added equipment support
- Strong steel construction with lockable front door for security
- Easy cable management and flexible installation options
- Advanced build technology
- Material thickness: SPCC cold rolled steel
- Mounting profile 1.50 mm

### Key Highlights

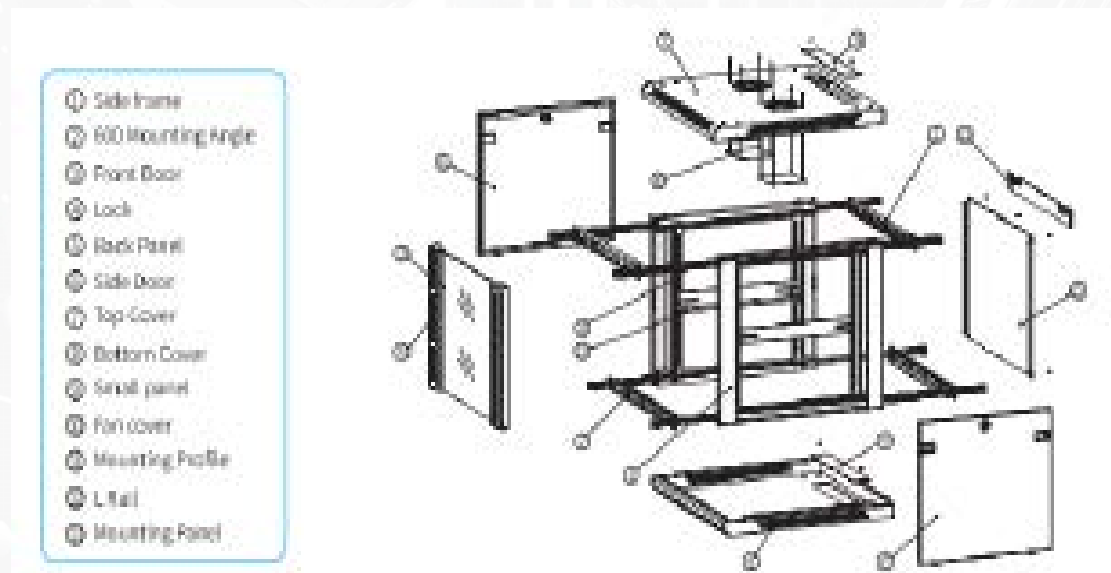

- Durable and secure with a powder-coated finish and lockable glass door
- Easy access and maintenance via removable side panels
- Universal compatibility with 19-inch rack equipment and adjustable rails
- Space-efficient design with safety grounding features included
