

LT-CAB6U1F1R

6U Indoor Cabinet with 1 Fan and 1 Rack Shelf

The LT-CAB6U1F1R 6U Indoor Cabinet is a compact and durable network enclosure designed to house and protect critical IT and communication equipment. Built with a robust steel frame, this 6U cabinet is ideal for small-scale network setups, surveillance systems, or telecom installations. It comes equipped with one pre-installed fan for active cooling and one rack shelf to support devices that do not have rackmount capability. Tailored for indoor environments, the LT-CAB6U1F1R ensures efficient cable management and secure organization of rack-mounted components, making it a practical choice for offices, server rooms, or control centers where space is limited but performance and protection are essential.

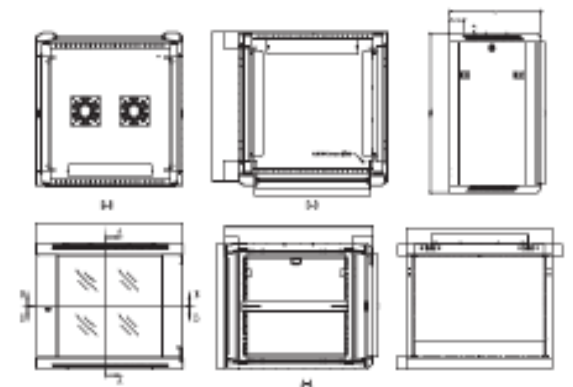

Key Features

- Compact 6U indoor cabinet with durable steel build
- Includes 1 cooling fan and 1 versatile rack shelf
- Secure, lockable front door with removable side panels
- Optimized for airflow with ventilated design
- Ideal for small-scale IT, network, or surveillance setups

Key Highlights

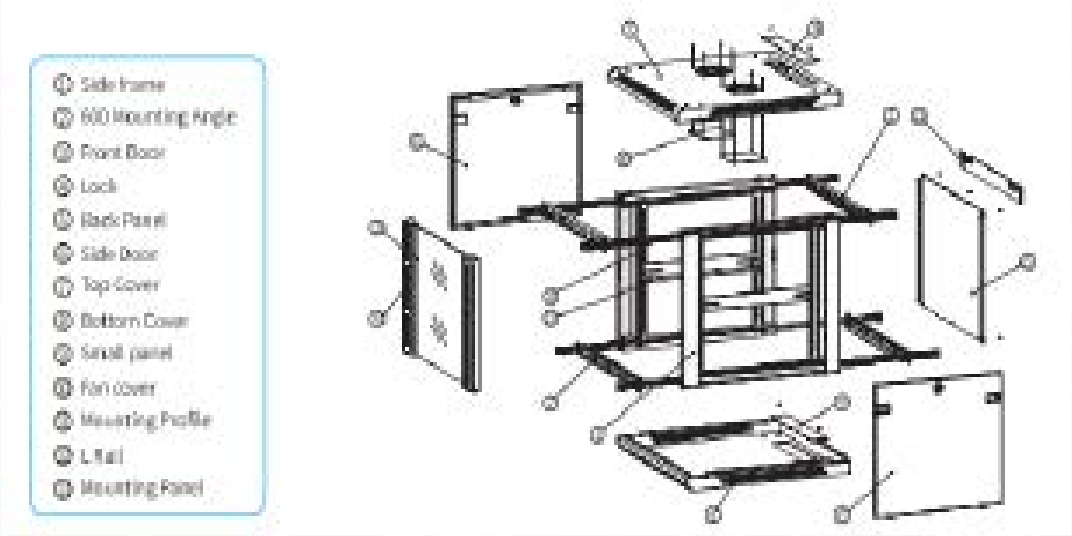

- Glass front panel for visibility and security
- Flexible cable routing with top and bottom entry points
- Compatible with standard 19" rack equipment
- Durable powder-coated finish for long-term use
- Adjustable rails and wall-mount option for installation ease
- Built-in grounding for enhanced electrical safety
