

LT-CBL-CLM-2-1/2L

CABLE CLAMP FOR 1/2" RF CABLE (50 OHM) - THROUGH TYPE

The LT-CBL-CLM-2-1/2L is a high-quality coaxial jumper cable designed for reliable RF signal transmission between devices. Featuring durable connectors and low-loss cable, it ensures stable and efficient connectivity in telecommunication systems, wireless networks, and antenna setups.

With its robust construction and flexible design, this 1.5-meter cable is suitable for both indoor and outdoor applications, providing consistent performance in high-frequency and high-power RF environments.

Key Features

- Low-loss construction for stable RF performance
- Durable connectors for secure connections
- Flexible and easy to route
- Suitable for indoor and outdoor use
- Supports high-frequency and high-power applications
- Reliable performance in telecom and wireless networks

Key Highlights

- Ensures stable, low-loss RF signal transmission
- Flexible design for easy installation in tight spaces
- Durable connectors for long-term reliability
- Ideal for telecom, wireless, and antenna systems
- Suitable for both indoor and outdoor environment

Specifications

PART NUMBER	LT-CBL-CLM-2-1/2L
Description	Cable Clamp for 1/2" RF Cable (50 Ohm)-Through Type
Cable Type	1/2" RF Cable (50 Ohm)
Cable Number	2
Diameter	15.70mm
Plastic Material	Modified PP
Metal Material	Stainless steel
RoHS	Yes

Applications

- Connecting antennas to RF equipment
- Telecom base stations and wireless networks
- Broadcast and signal distribution systems
- Test and measurement setups
- Indoor and outdoor RF installations
- High-frequency and high-power RF systems
