## 4-Inch 6-Cavity Duplexer

These Lamatel 4-inch 6-cavity base station duplexers are ideal for high power close frequency separation installations. These Band-Pass filters are designed for the combination of 2 frequencies that require extra isolation or they can be used as an efficient pre-selector. If higher levels of isolation are required, please consider using the 8 cavity configuration. Selectivity can be determined by the field adjustable loops.

### Key Features

- Wide frequency range: 406-512 MHz
- 6-cavity, 4-inch design for high selectivity
- Supports TX/RX on a single antenna
- Low insertion loss and high isolation
- Rugged, compact, and tunable for custom use

### Applications

- Wide frequency range: 406-512 MHz
- 6-cavity, 4-inch design for high selectivity
- Supports TX/RX on a single antenna
- Low insertion loss and high isolation
- Rugged, compact, and tunable for custom use

### Specifications

### Key Highlights

- High power handling capacity for demanding RF environments
- Stable performance across temperature variations
- Precision-tuned cavities for enhanced frequency stability
- Easy integration into existing communication systems
- Minimal maintenance with long operational lifespan
- Designed for both indoor and sheltered outdoor installations
